

Guillermo, Justine Rome M.

Application of Image Processing

1. Create an application that will update a give pdf by providing an image in the page.

Source Code:

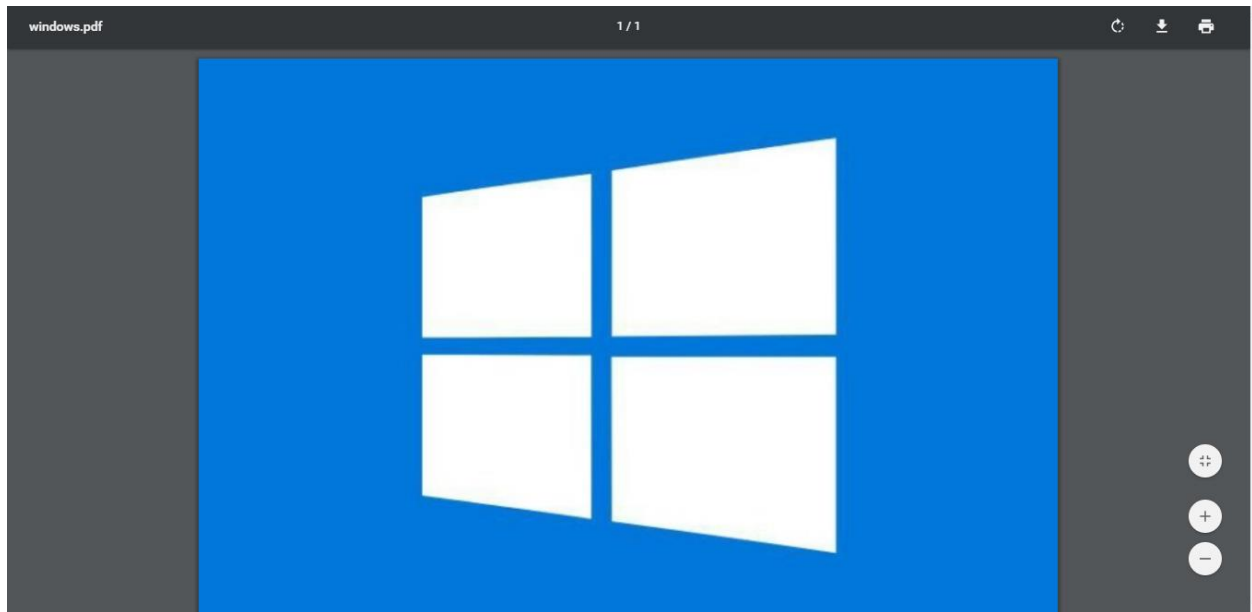

```
import fitz
print("Inserting image into PDF File")
doc = fitz.open('C:\\Users\\Justine Guillermo\\Google Drive\\PROG\\PYTHON\\Notes\\windows.pdf')
rect = fitz.Rect(0, 0, 100, 100)
for page in doc:
    page.insertImage(rect, filename = 'C:\\Users\\Justine Guillermo\\Google Drive\\PROG\\PYTHON\\Notes\\windows.jfif')
doc.saveIncr()
print("Done inserting The Image in PDF File")
```

Output:

```
Inserting image into PDF File
Done inserting The Image in PDF File

Process finished with exit code 0
```

Before

After
